

Village Analytics Report

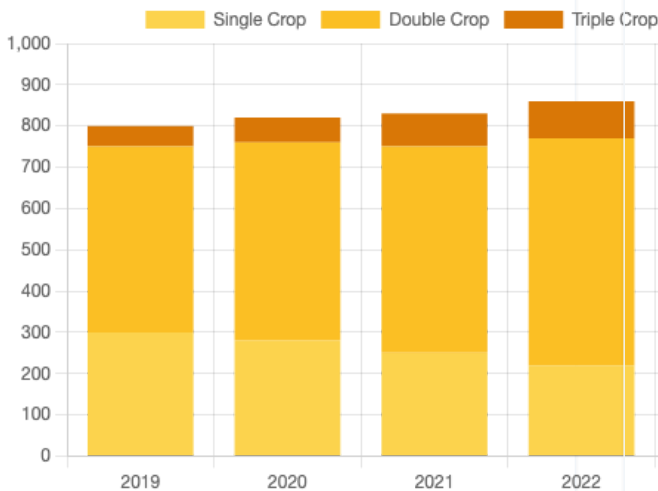

Kaptanpur — Ichhawar, Sehore, Madhya Pradesh

CoRE Stack MWS

EXECUTIVE SUMMARY

- Kaptanpur village has shown remarkable improvements in agricultural and ecological metrics over the last 5 years.**
- **Cropping Intensity**: The area under double and triple cropping has increased significantly, displacing single crop areas. This indicates better water availability and farming practices.
 - **Surface Water**: Total surface water area during the monsoon and winter seasons has increased by over 30%, suggesting successful watershed management interventions.
 - **Vegetation**: Tree cover has seen a steady positive net change of 45.5 HA, reflecting successful afforestation drives.
